

# MultiMix 8 USB 2.0 FX

## EIGHT-CHANNEL MIXER WITH EFFECTS AND 24-BIT, 96 kHz MULTI-CHANNEL INTERFACE

**MIX IT LIVE AND SEND IT ALL TO YOUR MAC OR PC.** The MultiMix 8 USB 2.0 FX is a compact mixer with built-in effects and a high-resolution, multi-channel recording interface so you can mix, record, and do both at the same time. Offering microphone inputs with phantom power, guitar-direct inputs, and line-level inputs for connecting everything else, plus a selection of stage-ready effects, the MultiMix 8 USB 2.0 FX delivers clean audio to your PA and recording systems.

Like the other mixers in Alesis' MultiMix USB series, the MultiMix 8 USB 2.0 FX contains a complete USB recording interface. Where this mixer differs from others in the lineup is in its USB 2.0 technology. This enables you to send 10 channels (8 input channels plus the 2-Track input) individually to the computer, at up to 24-bit, 96 kHz resolution. Because each channel is sent individually, you can use virtually any DAW or other music software for mixing and editing the incoming audio.

## FEATURES

- › Eight-channel mixer with mic, line, and guitar-level inputs
- › 24-bit, 96 kHz 10x2 USB interface for single-cable recording and playback with your Mac or PC
- › XLR inputs with gain trim, switchable high-pass filters, and 48V phantom power
- › 1/4-inch line-level inputs for instruments and high-impedance guitar input for direct-connecting guitars
- › Powerful EQ: three-band with sweepable parametric mids on channels 1 and 2, three-band on 3 and 4, two-band on 5 – 8
- › Built-in DSP effects with footswitch bypass control and Aux buss for external processing
