touch	**1st**	Audio Playback	Audio Playback	Audio Playback	Audio Playback	Audio Playback	TBD
	2nd	Audio Playback	Audio Playback	Play and Record**	Audio Playback	Audio Playback	Audio Playback

* When a 3rd generation iPod is used with this product, the iPod will not charge. Although 3rd generation iPods feature dock connectors, these iPods communicate via FireWire, not USB (which is used on all newer iPods), making it impossible for many products with dock connectors to provide a charge to 3rd Generation iPods.

** You can record using a third-party recording application for iPod touch, such as iProRecorder.

Note: While most of these products will let you record to your iPod automatically, in some cases, you may need to navigate to your iPod's Voice Memos section to record.

Due to the potential of future iPod firmware updates, this information may change over time.
